Offenders Released From
Division of Corrections Adult Institutions in 1981

This bulletin is designed to provide information about the 1,849 persons, 1,749 males and 100 females, reported as first and rereleases from Wisconsin's adult correctional institutions during calendar year 1981. An additional 71 persons also released in 1981 are included only in Table 1. This group consists of 38 persons released after completion of probation, parole, or mandatory release revocation hearings, 32 persons released after completion of alternative to revocation contracts, and one person released following an erroneous admission. Tables 2-21 contain a variety of data relating to such items as offense, length of stay, work release participation, etc. Tables are arranged so that comparisons can be made between males and females as well as between first and rereleases.

During 1981, 1,390 men were reported as first releases, an increase of 12.6 percent over 1980 levels and a high for the five-year period. The greater portion (96.6 percent) of these men were released to some type of field supervision status; i.e., parole, mandatory release, or special action early release./1 The remainder were discharged either because of completion of sentence or court action or died while incarcerated. The average length of stay for first-released males rose from a five-year low of 22.8 months in 1978 to a high of 26.6 months in 1981. The proportion of first releases who had been committed from Milwaukee County decreased from 44.3 percent in 1980 (a five-year high) to 39.5 percent in 1981.

The Division of Corrections provides a wide range of program activities for persons under institutional supervision. A revision of the statistical reporting system, which was carried out in 1979 and became operational on January 1, 1980, now makes it possible to provide readers of this bulletin with some information on the programs in which offenders first and re-released in 1981 participated in while incarcerated. Slightly less than one-third (28.8 percent) of the males first released in 1981 had taken part in some type of drug and/or alcohol treatment program during the course of institutionalization, a slight increase over levels reported in 1980. Participation in the Work Release program dropped slightly during 1981. Reported participation in both Adult Basic Education and GED or HED programs increased slightly over 1980 levels.

*Information not available for 1977-1979.

/1 A special action early release is a release, under intensive supervision, granted by the Department Secretary of an individual who is within 90 days of his or her mandatory release date, has not received a discretionary parole, and is not an assaultive, sex, or drug offender.

Ninety-eight females were reported as first-releases during 1981, a high for the five-year period and an increase of 40 percent over 1980 levels. A decrease in the average (mean) length of stay first noted in 1980 continued with a 2.8 month decrease reported in 1981. The proportion of first-released females committed from Milwaukee County reached a five-year low of 45.0 percent in 1981. Reported participation in Adult Basic Education and GED or HED programs increased slightly over 1980 levels. Participation in alcohol and/or drug programs increased 9.2 percent. Work Release participation, however, declined in 1981.

TABLE C

Selected Characteristics for Rereleased Adult Males
1977-1981

*Information not available for 1977-1979.

Three hundred and fifty-nine males were reported as rereleases from Wisconsin's adult institutions during 1981. This is as high for the five-year period and a 25 percent increase over figures reported in 1980. The average (mean) length of stay increased to a five-year high of 22.7 months in 1981. The proportion of re-released males reported to have taken part in work release programs while incarcerated increased 4.3 percent over 1980 levels.

A trend table has not been prepared for re-released females because smallness of numbers makes data fairly meaningless. Two females were reported as re-releases during 1981; both had been committed from Milwaukee County, both had participated in drug and/or alcohol programs, one had work release experience, and both spent between 18 and 24 months in the institution prior to release.
